Summary

Final-year Computer Science student at The Saigon International University (GPA: 3.20/4.0). Experience in backend and ERP application development using Python, PostgreSQL, Git, the Odoo framework and AI applications. Relevant projects include an Odoo-based patient management dashboard and a product management system.

Education

B.Sc. in Computer Science, The Saigon International University (2022 - Present)
GPA: 3.20/4.0 | **Relevant Coursework:** Object-Oriented Programming, Web and Mobile Development, Database Systems, DevOps.

Projects

- **Product Management System (07/2026-Present)**
  Built a custom Odoo 19 module featuring dynamic product attributes, product comparison, inventory monitoring, and role-based access control. Containerized Odoo and PostgreSQL with Docker Compose and deployed the system to UAT for evaluation by an internal team.
- **Hypertension Management Platform (12/2025-5/2026)**
  Developed a custom Odoo module for hypertension management using the Odoo ORM, model inheritance, XML views, and access controls. Outcome: integrated the dashboard with a mobile app and chatbot to deliver a hypertension management platform that successfully completed UAT for a public health organization.
- **Mobile Chatbot for Vietnamese Traffic Law (03/2025-09/2025)**
  Developed a React Native mobile app and conducted research on a Vietnamese traffic law chatbot. Award: Second Prize, SIU Student Research Competition; Semifinalist, EURÉKA 2025.
- **AI Challenge 2024 (AIC2024)**
  Contributed to a multimodal retrieval web application by developing APIs, integrating vector databass, and supporting AI model evaluation.

Experience

- **Software Engineer Intern, HCM Center for Disease Control - HCDC (12/2025 - 05/2026)**
  Contributed to the development of an integrated hypertension management platform for HCDC. Built an Odoo web dashboard for patient management and risk classification workflows, integrated with a mobile app and chatbot. Supported a production-ready release through testing, debugging, error analysis, and UAT.
- **AI Research Intern, SIU AI Lab (06/2024 - 09/2024)**
  Built Python web crawlers to collect and preprocess social media data, researched aspect-based sentiment analysis and fine-tuned a T5 model.

Honors & Awards

2025 - Semifinalist, EURÉKA National Scientific Research Contest
2025 - 2nd, SIU Student Research Competition
2024 - Top 30, HCM AI Challenge
2024 - 32nd/110, AI City 2024 (Traffic Safety Analysis)
2024 - 16th/72. Angel Hackathon 2024 (Object Detection)

Skills

Programming: Python, JavaScript, TypeScript, SQL
Odoo Development: Custom Modules, ORM, Model Inheritance, XML Views, Access Controls
Technologies: FastAPI, React Native, PostgreSQL, MongoDB
Tools & DevOps: Git, Linux, Docker, GitHub Actions, GitLab CI/CD, Codex, Claude
Software Engineering: OOP, Data Modeling, REST APIs, Testing, Debugging, UAT
Languages: Vietnamese (Native), English (Intermediate)
